

# react-ipdf-viewer-lite

## Introduction

A React component for viewing PDF documents using Mozilla's pdf.js. Embed a customizable PDF viewer in your React applications with page zoom, theme, Full Screen, Page Count and download support.

## Demo

Explore the live demo: <https://react-ipdf-viewer-demo.vercel.app/>

See the viewer with zoom, navigation, and themes in action.

# react-ipdf-viewer-lite

## Installation

Install with npm:

```
npm install react-ipdf-viewer-lite
```

Or using Yarn:

```
yarn add react-ipdf-viewer-lite
```

Peer dependencies:

- react ( $\geq 16.8.0$ )
- react-dom ( $\geq 16.8.0$ )
- pdfjs-dist ( $\geq 2.9.359$ )

## Features

- Render PDFs from URLs or local files.
- Zoom and full-screen support.
- Theme options: light and dark.
- Navigation controls and download.
- Modern browser support.
- TypeScript compatibility.

## Usage

Example Usage in React:

```
import React from "react";
import { ReactIPdfViewerLite } from "react-ipdf-viewer-lite";

const App = () => {
  return (
    <div className="App">
```

## react-ipdf-viewer-lite

```
    <ReactIPdfViewerLite src="sample.pdf" theme='light'/>
  </div>

);

};

export default App;
```

# react-ipdf-viewer-lite

## Error Handling and Troubleshooting

1. Invalid PDF URL - Check path or URL validity.
2. CORS Issues - Ensure server allows cross-origin access.
3. Content Security Policy - Allow 'blob:' in connect-src.
4. Mobile Issues - Prefer HTTPS URLs.
5. Corrupted File - Use valid PDF format, add try-catch.

## Contributing

- Fork the repository.
- Create a new branch.
- Commit and push changes.
- Open a Pull Request with details.
